**Summary of reasons
for classification:**

The publication entitled *Cytherea Is Squirtwoman* is classified as:
Objectionable.

The publication is a DVD comprising, primarily, a sexually explicit feature with an overt focus on women who can emit large quantities of fluid from their genitals during stimulation. The participants in the activity play with, wipe, lick, and express admiration for the fluid, which because of the volume presents as urine. Given that this behaviour is presented within a publication designed for the sexual arousal of adults, the publication clearly validates this conduct as being arousing. Consequently the publication promotes and supports the use of urine in association with sexual conduct.

The Classification Office has considered the effects of the New Zealand Bill of Rights Act 1990 on the application of the classification criteria. The classification of this publication interferes with the freedom of expression, but this is an outcome that is consistent with Parliament's intention that publications falling under s3(2) of the Films, Videos, and Publications Classification Act are deemed to be objectionable.
